SRI LAKSHMI NARAYAN

CYBERSECURITY STUDENT • SOFTWARE & AI PROJECTS

Second-year B.E. Computer Science Engineering student specializing in Cybersecurity at RNSIT, with a CGPA of 9.35. Experienced in cybersecurity fundamentals, AI/ML concepts, and practical software development. Proven track record in building interactive web prototypes, computer-vision features, and collaborating on hackathon innovation projects.

Bengaluru, Karnataka srilakshmin249@gmail.com linkedin.com github.com/srilakshmin249

SELECTED PROJECTS

AI-Based Exam Proctoring System

TensorFlow.js • BlazeFace • COCO-SSD

Architected and implemented a web-based automated monitoring system. Integrated real-time facial tracking, head-movement monitoring, dynamic phone detection, tab-switch event logs, and a dynamic suspicion-score calculation engine to prevent academic dishonesty.

Civic Connect

Civic Tech • Frontend • Geolocation

Designed a responsive civic issue reporting application featuring precise GPS geolocation tagging, dynamic image uploading, and detailed grievance submission. Selected for potential patent filing.

SatQuery AI

AI Prototype • Satellite Data

Developed a natural-language query interface designed to streamline satellite imagery discovery, spatial filtering, and area-of-interest analysis workflows.

NyayaFlow Judicial Backlog Analyzer

Streamlit • Data Viz • Python

Constructed an interactive judicial dashboard analyzing case pendency, rendering interactive visualizations and district-level metrics to highlight court operational bottlenecks.

Algo X - Algorithm Learning Tool

Web • Algorithms • Data Structures

Engineered an interactive educational portal designed for algorithm visualization and execution comparison, improving student engagement with core computer science concepts.

EcoPath - Sustainability Solution

Sustainability • Frontend UI

Collaborated in designing user interface workflows and presentation materials for an environmental sustainability hackathon concept.

EDUCATION

B.E. CSE - Cybersecurity

RNS Institute of Technology

Second Year • CGPA: 9.35

TECHNICAL SKILLS

LANGUAGES
Python, C

WEB TECHNOLOGIES
HTML, CSS, JavaScript, Browser APIs

AI / COMPUTER VISION
TensorFlow.js, BlazeFace, COCO-SSD, Generative AI

CYBERSECURITY & NETWORKING
Linux Fundamentals, TCP/IP, DNS, HTTP/S, SSH, Network Security

DATA & TOOLS
DSA, Pandas, NumPy, Matplotlib, Streamlit

CERTIFICATIONS

Samsung Innovation Campus

Summer Internship

Selected participant in Python, DSA, Generative AI, & Hackathon development.

NASSCOM

AI, Big Data, and Cybersecurity credentials.

Infosys & Foundational AI

C Programming and core AI implementation concepts.

ACTIVITIES

- Tech Auction Participant
- Smart India Hackathon (SIH) Internal
- ImpactX Organizing Committee
